

2021

What part of Nature are you?

First early birdsong wakes you up. After many nights spent outdoors you recognize this particular melody and you know that it's way too early to get out of your cozy and warm shelter.

- Sshh, little bird, give me five more minutes.

He listens to you and flies away.

With the next bird calls you notice the sounds of your friends moving around in their hammocks. This characteristic rustle is an infallible sign of a beginning of a new day. First sound of a zipper and this is it - it's time to get up. But there is one more sound that brings you even more joy - the most lovely song of grinded coffee beans.

You get up, stretch and realize you have a whole day of adventures coming up. Is there anything better than mornings like these?

LESOVIK was established in 2013. Our idea was to get closer to nature in the most pleasant and comfortable way possible. As the time flies and the world changes, we feel it's still not enough. We have only one home, and there's no planet B, so we better take care of what we have.

We no longer want just to get closer to Nature. We all need to understand that we're part of it, and to live as a part of the biggest known living organism - the Earth.

Hammocks

Only a few minutes in the hammock will let you deepen your relationship with the surrounding nature and realise that you're at home. Whether you're setting off on a journey through the unknown, taking a survival course or just going for a bikepacking trip – bring along our hammock. It's small, light and incredibly comfortable. Give it a try and it will become your best travel companion in no time.

DUCH Olive Green

Our all-time classic, representing a decade of Lesovik's history.

DUCH is a versatile hammock for all year round use. It combines minimalism, versatility, technical advancement and superb quality. Thanks to its compact size, it fits into any bag. A great starting point for building a personalized sleep system with our accessories – suspension system, underquilts or a mosquito net.

SUL

A record-breaking, mind-bending transparent set designed for extreme weight savings, but without compromising comfort or reliability. It's still a full-sized hammock with a reasonable load limit. SUL is meant for people counting and cutting each gram of their gear in order to travel lighter, faster and further. Paired with the hammock is SMUK ULTRALIGHT adjustable suspension system with super-strong, hand spliced Dyneema ropes.

Fabric
breathable ripstop nylon
micro-mesh

Size
300 × 145 cm

Weight
170 g (300 g full setup)

Packed size
17 × 7 × 7 cm

Weight limit
150 kg

Includes
ultralight suspension system

- NEW for Q1 2021 connection toggles now in blue and with reflective cord for increased visibility and to address colour blindness

Tarps

The key to perfect shelter? Low weight, lots of room and just a few minutes to set up.

Tarps are minimalistic and intuitive shelter systems that will protect you from adverse conditions. They will give you a roof over your head whenever sleeping in a hammock, on the ground or simply as a central meeting point in the camp, for cooking or organizing your gear.

HEKSA Crocodile Green

HEKSA is a hexagonal tarp designed with regard to specific hammock camping requirements. It offers more effective cover area to use and at lower weight than regular square tarps. Catenary cut shape allows for easier, tighter pitch whereas lifted ridge ends work better with hammock suspension system. HEKSA features an integrated suspension and rigging system, allowing for setup using only one hand and without tying any knots.

*poles not included

● NEW for Q2 2021
Kangaroo Brown colour

A photograph of a hammock system set up in a forest. The hammock is suspended between two trees, with a dark green mosquito net and a tan underquilt attached. The background shows a dense forest with green foliage and tree trunks. In the foreground, some camping gear like a metal pot and a silver thermos are visible on the ground.

Additional equipment

Whether you are camping in winter or summer, in the boreal forests of the North or dense jungles of the tropics, the modularity of Lesovik systems will let you adjust your shelter gear to match the conditions. MAGLA Mosquito Net and OTUL Underquilts are examples of equipment that extend the range of use for our hammock systems.

OTUL

OTUL quilt protects from harsh weather conditions, allowing you to sleep comfortably in the hammock even in winter. The underquilt creates an insulating layer of warm air around you and adjusts to your body movements thanks to the flexible suspension system. Hydrophobic Climashield APEX as insulation paired with PU-coated ripstop nylon with DWR treatment as outer shell create windproof and water resistant shield

Insulation
Climashield APEX 133

Size
200 × 140 cm

Weight
820 g

Compressed size
approx. 4l

Temp. range
from 10°C to -5°C

Includes
suspension system

- NEW for Q1 2021
updated, detachable suspension
system for quick quilt switch

OTUL Lite

OTUL Lite is a lighter version of our OTUL underquilt, designed for comfortable sleep from late spring to early autumn. You can get a good night's sleep without the need to carry the excess load and weight of a winter quilt. Climashield APEX as insulation paired with DWR ripstop nylon as outer shell create windproof and water resistant shield.

Insulation
Climashield APEX 67

Size
200 × 100 cm

Weight
440 g

Compressed size
approx. 2,5l

Temp. range
from 7°C up

Includes
suspension system

- NEW for Q1 2021
updated, detachable suspension
system for quick quilt switch

OTUL Air

OTUL Air is the lightest European summer hammock quilt. It's manufactured in Poland, with the highest precision and experience available. It's the ultimate solution for warmth and comfort for ultralight hikers and bikepackers, as it allows to extremely limit your pack's weight and volume. If technical details are a thing, we made it from 700 FP Polish White Duck Down and TORAY Airtastic SLF15 DWR fabric. It's just crazy light.

Insulation
700 FP Polish White Duck Down

Size
200 × 100 cm

Weight
340 g

Compressed size
approx. 0,7l

Temp. range
from 7°C up

Includes
suspension system

MAGLA Mosquito Net

Completely redesigned MAGLA is now lighter, easier to use and at half the packed volume of its previous version.

After some serious design work done by professional engineer, our mosquito net requires literally only one click of a snap button to work seamlessly with any gather-end camping hammock – no cords, adjustments or a suspension system required. Super dense net in MAGLA (approx. 570 holes per cm²) will keep even the smallest midges outside

Fabric
high-density polyester mesh

Size
300 × 150 cm

Weight
180 g

Compressed size
26 × 11 × 11 cm

Includes
stuff sack

- **NEW for Q1 2021**
The entire concept

HUBA Gear Shelf

Simple and effective solution for gear storage, conveniently keeping your gear out of the dirt or damp and easily within arm's reach. HUBA is made of waterproof silnylon to better secure your gear. Elastic edges help with keeping everything in place, whereas adjustable suspension system with quick attachment hooks allows for super easy installation iliterally in seconds and without any knots. HUBA is comaptible with any hammock suspension system.

Fabric
microtipstop silnylon

Size
145 × 90 cm

Weight
115 g

Compressed size
8 × 7 × 7 cm

Includes
stuff sack, adjustable
suspension system

Suspension systems

Lesovik SMUK and NITI suspension systems allow for easy hammock & tarp setup. Without tying knots, in all conditions, quickly and precisely.

SMUK Hammock Suspension

SMUK speeds up hanging a hammock and allows you to easily adjust your setup on the go. What lies at the heart of the system is a set of adjustable loops made of Dyneema – a solution also known as whoopie slings. With only one move you can change the length of the slings. No need to tie any knots! Thanks to the webbing straps wrapped around the tree you will not bring any damage to the bark.

Materials
UHMWPE, aluminum, PE

Adjustment range
50–300 cm

Weight
160 g

Packed size
4 × 9 × 9 cm

Load limit
250 kg

Includes
2x 175 cm straps, 2x loops,
2x carabiners, manual

- NEW for Q1 2021 suspension system carabiners now in blue for increased visibility and to address colour blindness

SMUK Hammock Ridgeline

SMUK Hammock Ridgeline is an addition for hammock's suspension system, a must-have for advanced hammock lover. It allows better sag and tension regulation, providing a consistent lay. It's also a handy way of hanging your essential gear like camping light and for supporting MAGLA Mosquito Net.

Materials
UHMWPE

Adjustment range
240–300 cm

Weight
17 g

Packed size
9 × 2 × 2 cm

Includes
manual

NITI Tarp Suspension

Universal tarp rigging and adjustment system designed to work with any outdoor tarp that lacks an integrated or a preinstalled suspension system. You'll love it for the possibility to readjust your tarp without untying the guylines.

Materials
PE, nylon

Ridgeline max. length
900 cm

Guyline max. length
200 cm
