THE WORLD OF SOUTH AMERICAN LUXURIOUS CANVAS HAMMOCKS KOALA HAMMOCKS

[www.koalahammock.com](http://www.koalahammock.com)

We are proud that we can present you with a collection of Koala Hammocks.

These products are made by hand in compliance with all rules of weaving traditions of Central and South American artisans. Artists and craftsmen from Central America possessed the deep knowledge of the manufacturing process as well as of the choice of materials, methods of dyeing fabric and shaping hammocks. Our hammocks are only handicrafts products as weaving methods and tools did not allow for mass production.

Koala Hammocks were first exhibited in Europe at the fair in Berlin in 1973 and since then they have gained increasing popularity among European customers. Patterns and ways of weaving are the heritage of the long tradition of crafts. They are not mass production, industrial machinery is not used for the manufacturing of our hammocks.

Koala Hammocks are distributed in almost all the countries of the European Community, the United States, the Caribbean, Chile, Israel, and many other countries. The collection consists of single, family hammocks as well as hammock chairs and hammock accessories created on the basis of the needs of our customers, their tastes and desires.

We strive to achieve the best quality of hammocks made from high quality cotton. We try to adapt collections to the latest trends and colors in fashion.

Thank you for choosing KOALA HAMMOCKS
